EMGE®

18 OCTOBER 2019

REACH STATEMENT

The European Union's REACH Directive (EC 1907/2006) is designed to regulate the Registration, Evaluation, Authorisation and Restriction of Chemical Substances. REACH legislation was finalised in December 2006 and has been in effect since June 2007. In an effort to address the requirements of the REACH regulation and ensure a reliable ongoing supply of EMGE parts, EMGE has contacted suppliers to confirm all necessary registration of in-scope substances in formulations, preparations, materials or articles to be completed by the REACH deadlines. In addition, suppliers have been requested to assess the potential presence of Substances of Very High Concern (SVHC). The 206 SVHC substances are not intentionally added or used in the manufacture of EMGE products as of 18 October 2019.

As EMGE does not intentionally add SVHC, and based on the "Article" criteria in the REACH regulation, all articles manufactured by EMGE are interpreted to be exempt from substance regulation and therefore compliant with the REACH regulation.

ON BEHALF OF EMGE

QC MANAGER
